Aerial Impressions

Est. 1997

Aerial Impressions is a specialist aerial Photography company servicing all of the USA
We will be conducting aerial photography in your area in the next few weeks and have a special offer running for this time

Aerial Impressions was established in 1997 and delivers high quality photography to business and property owners including oblique and vertical photography..

Aerial Impressions has developed a unique navigation system using GPS technology to easily and efficiently locate and identify properties thereby minimizing airtime costs and passing the saving onto our clients.

An aerial photo will provide a unique perspective of your property and will become a treasured heirloom in years to come. All work undertaken by Aerial Impressions is shot on professional aerial photography equipment capturing 21 mega pixels allowing for superb detail on enlargements.

Oblique Style

Photographs can be taken a number of different ways and are shot to your specifications.
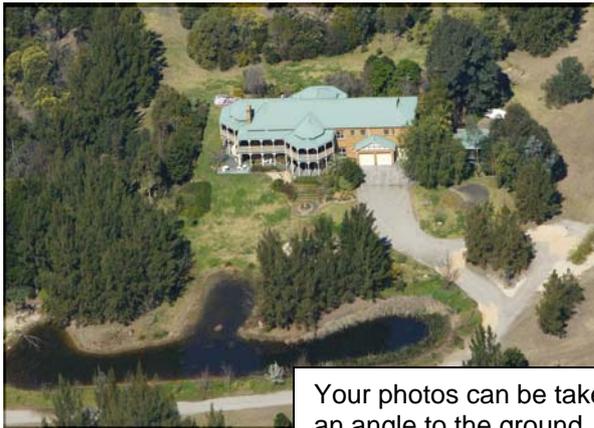

Your photos can be taken at an angle to the ground maximizing the 3-D effect. This is ideal for wall photos, brochures and websites. We take a variety of shots from different directions with some showing the surrounding areas plus some close up of the building areas.

Your photos can be taken vertically straight down, map style. This is ideal for planning and mapping purposes. The maximum area is 200 acres for vertical. Larger properties than 200 acres will be done as close as possible to vertical.
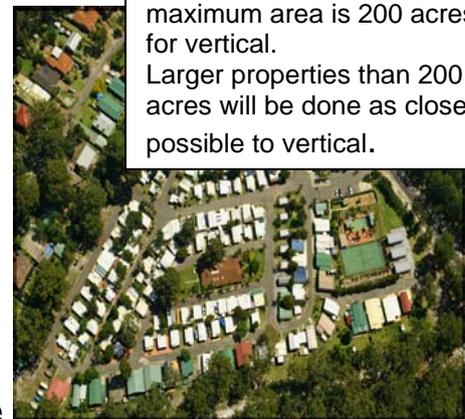

Map Style

Optional extras

Both Map and Angle style shots (includes an extra 10 photos) $40
